SYED ABDUL KADAR P

Cybersecurity | Web Application Security | Penetration Testing

Chennai, Tamil Nadu, India | +91 7094762770 | syedabdulkadar8@gmail.com

Portfolio: abdulkadar-coder.github.io/abdulkadar-tech

PROFESSIONAL SUMMARY

Entry-level cybersecurity professional focused on web application security, reconnaissance and vulnerability assessment. Finds and validates security issues with Burp Suite, Nmap, SQLMap and Metasploit on Kali Linux, then reports them with clear impact and a working proof of concept. Background includes cybersecurity internships, three bug bounty reports and several CTF competitions. Seeking a junior security role in penetration testing or application security.

TECHNICAL SKILLS

Web Application Security	OWASP Top 10, SQL injection, cross-site scripting (XSS), IDOR, authentication and authorization testing, API security fundamentals
Reconnaissance and Assessment	Asset discovery, subdomain enumeration, network scanning, directory listing checks, information disclosure, SSL/TLS misconfiguration checks
Security Tools	Burp Suite, Nmap, SQLMap, Metasploit, Kali Linux
Programming Languages	Python, Java, JavaScript, C
Operating Systems	Linux, Windows
Security Practices	Vulnerability assessment, bug bounty hunting, vulnerability documentation, proof-of-concept development, responsible disclosure, report follow-up

INTERNSHIP EXPERIENCE

Cybersecurity and Web Application Security Intern | NullClass (Virtual) October 2025 – Present

- Test web applications for OWASP Top 10 vulnerabilities, including SQL injection, XSS, IDOR and broken access control
- Take part in bug bounty programs and document each finding with reproduction steps, impact and proof of concept
- Review triage feedback to understand how reports are validated and to improve responsible disclosure practice

Web Exploit Hunting and Bug Bounty Intern | EduSkills September 2026

- Completed an eight-week program on bug bounty fundamentals, lab setup, reconnaissance and information leakage
- Practised SSL/TLS and cookie security checks, scanning, enumeration and web exploitation; finished with a capstone project

Network Security Intern | Extazee Software

- Learned core network security concepts and built a foundation in network assessment and spotting potential weaknesses

Cybersecurity Project Intern | DG Interns Hub

- Completed project-based cybersecurity tasks that applied security concepts to practical problems

PROJECTS

ZeroTrust HRMS | Zero-Trust Employee Data Management System github.com/abdulkadar-coder/decentralizeddb

- Built a TypeScript REST API with JWT authentication and role-based access control, re-checked on every request
- Encrypted documents with AES-256-GCM using context-bound AAD and SHA-256 integrity checks; only ciphertext reaches storage
- Added a hash-linked audit chain and a four-org Hyperledger Fabric network, with 69 automated tests and 38 live checks

BUG BOUNTY AND VULNERABILITY RESEARCH

- **Carenium, KYC Data Exposure:** Investigated an access-control and storage misconfiguration potentially exposing KYC data. Disclosed; verification ongoing.
- **Dekco, PACS/Orthanc API:** Reported potential unauthenticated access to a medical imaging API (#73328074). Under review.
- **Vibinex, SQL Injection:** Reported a potential SQL injection vulnerability (#80036429). Under review.

CERTIFICATIONS AND TRAINING

Cybersecurity and Web Application Penetration Testing | NullClass October 2025

Python Programming | CodeTantra February – June 2025

Web Application Development | Star Systems March 2025

Cyber Security for Beginners | TCS November 2024

Additional Training: WiFi Pen Testing, Cyber Simulation

COMPETITIONS AND ACHIEVEMENTS

- **Into the Void 2.0** (international CTF), Chennai Institute of Technology, Team P4X7
- **Hackathon 2025** (NCSRC at IIT Madras), **ByteBeat 2025** CTF and **inter-college CTF** participation
